## MAMIZOLE 12% Injectable solution

البيانات العلمية مطابقة لما تم  
الموافق عليه من قبل اللجنة  
العلمية المتخصصة للأدوية البيطرية  
(For vet use only) إضافات  
الإعلاف داميرام ماهر

### Composition:

Each 100 ml contains:

17.1 gm of imidocarp dipropionate  
(eq. to 12 gm imidocarb base )

### Properties:

Imidocarb dipropionate is a substituted carbinilide, used as an antiprotozoan treatment for the control of babesia spp. Little is known about the mode -of- action of imidocarb dipropionate . it appears that imidocarb acts directly on the parasite, causing alteration in number and size of nuclei and in morphology(vacuolation) of the cytoplasm . the antiprotozoan activity is derived from the carbanilide acting on glycolysis of the parasite . this is the result of this class of drugs giving rise to hypoglycaemia in the host. Babesia as well as many other parasites like trypanosomes depends upon host glucose for aerobic glycolysis. There is also a selective blocking effect on the replication of the quinotoplastic DNA of the parasite

### Indication

For treatment and prevention of bovine ( red water fever – babesia divergens infection ) only.

### Target spp:.

Cattle.

### Dosage & administration

#### -Route of administration

subcutaneous injection only

#### -Dose of whole product

For treatment : 0.70 ml / 100 kg body weight once .

For prevention : 1.80 ml/ 100 kg body weight once .

### Warnings and precautions:

Not for use in any other species.

-Special precautions for use in animals

-Estimate bodyweight carefully and do not exceed the recommended dosage

-Special precautions for the person administering the veterinary medicinal product to animals

-Do not use if under medical advice not to work with compounds which may exhibit anti- cholinesterase activity

-Wash splashes of the product off the skin and eyes immediately.

Wear suitable protective clothing( ie impermeable gloves) when using the product .

## Contra-indications:

- Mamizole must not be administered intravenously or intramuscularly .
- Repeat doses of mamizole must not be given

## Adverse effect:

Animals may show cholinergic signs after dosing. It may be possible to alleviate these side effects by treatment with atropine sulphate. While side-effects (salivation, discomfort, muscle tremors, tachycardia, cough, colics) are rare, they do occur and deaths from anaphylactoid reactions have been recorded following product use.

## Withdrawal time:

Cattle: slaughter 213 days, milk 21 days

## Storage condition:

Store at a temperature not exceeding 30° C , used 40 days after opening at a temperature not exceeding 30° C .

## Pack:

Carton box containing amber glass vial type (II) filled with 100 ml injectable solution with red chlorobutyl rubber stoppers capped with AL/HDPE plastic flip off cap with outer label +insert leaflet .
